

Flooring Collection

Why TEKNO?

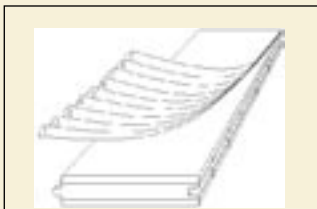

The Tekno engineered flooring collection is specially designed to re-invent solid hardwood flooring with Italian flair. This is one of the finest wood flooring collections on the market today! Tekno is engineered with the following fine attributes:

- Pre-finished with a high-wear finish that will last many years
- Smoothest Finish - just look at the samples and see for yourself
- Thick 1/8" wear layer allowing resanding up to three times
- Designed for a quick, easy, and trouble-free installation
- TrueSquare milling with the edges and ends milled after factory finishing for a site-sanded and finished in-place look

High Wear Finish:

9-coat, High-Wear, UV-cured Acrylic Urethane with Aluminum Oxide in the base coats and Anti-Scratch top coats in a Matte Gloss.

- 1) Primer Coat
- 2, 3) Fill Coat with aluminum oxide and ceramic particles
- 4, 5, 6) Fill Coat
- 7, 8, 9) Anti-Scratch Top Coats

About Tekno NA

Tekno NA utilizes Wood Flooring International Inc., to service the North American market. WFI supplies the finest wood flooring sourced from around the globe. We specialize in exotic (to North America) species as well as selected straight-grained/quartered offerings in the more popular domestic North American woods.

Other WFI Collections Offered:

- **WFI SingleStrip Collections**
The Exotic Collection in seven imported species and the American Quartered Collection in five species, pre-finished and engineered to replicate solid wood floors.
- **WFI Solid Exotics Plank Collection**
Traditional solid wood strip and plank flooring in over twenty different exotic species in a range of widths in both unfinished and pre-finished formats.
- **WFI FeatureStrip Collection**
Contrasting accent strips in five colors allow creative design on any solid wood floor.
- **WFI MultiPly - Architectural Collection**
Pre-finished engineered flooring offered in four exotic and three domestic species in two widths.
- **WFI MultiPly - Designer Collection**
Four exotic species engineered for tremendous value.

The Tekno Flooring Collection

European design captured in wood flooring.
Precision-milled with the absolute smoothest finish in the industry!

The Tekno

The TEKNO Collection:

Tekno is a European wood flooring manufacturer located near Naples, Italy. Tekno N.A. brings Italy's best wood flooring to you. Tekno is known for their precision-milled engineered flooring and "state-of-the-art" finish that rivals the finest furniture finishes.

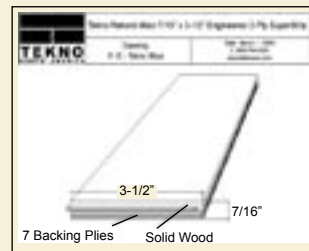

TEKNO Features:

- Smoothest Finish on the Market
- High-Wear Finish
- 7 Species to Choose From
- 3-1/2" Widths
- Random Lengths of 31", 35", & 39"

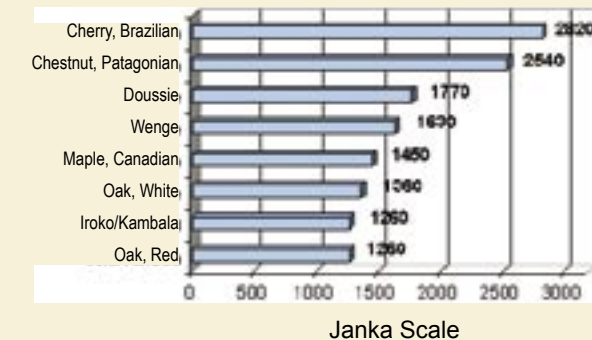

What is Engineered Wood Flooring?

Engineered wood flooring is designed to resist wood's natural tendency to change dimensionally over time. Comprised of multiple layers of wood, cross-banded for stability, this construction style is known as "engineered" wood flooring. Unlike solid wood flooring, engineered wood floors can be used in a greater range of installation settings and may be glued or nailed on a wide variety of subfloors.

Comparative Hardness Chart:

Janka Scale

The Tekno North America Flooring Collection

Domestic Species

Canadian Maple ▲

Known the world over as the “white wood” of choice, Tekno’s Maple is selected for uniform bright white color, without dark contrasting heartwood and streaks.

French White Oak ▲

The Arts and Crafts movement and Mission furniture both made liberal use of quartered White Oak. Tekno continues in that classic tradition providing a straight grained floor so highly sought in this wood.

African & South American Exotic Species

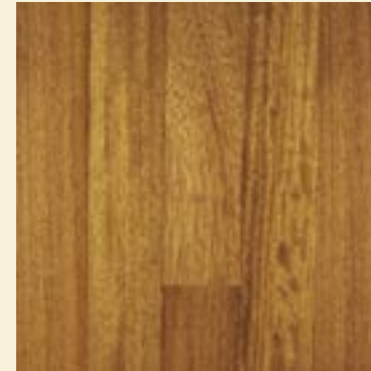

Brazilian Cherry ▲

The most popular imported Brazilian hardwood flooring species to the U.S. Known for its hardness and durability, this exotic hardwood is a great choice in both residential and commercial installations.

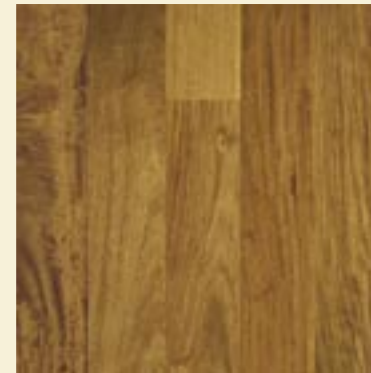

Doussie ▲

The most popular imported flooring used in Europe. Found in Central and West Africa. Perfect for residential or commercial use. Presents an elegant look to any room.

Iroko/Kambala ▲

Imported from West Africa, Iroko is commonly used as a harder Teak substitute. It is used in many applications from boats to furniture to hardwood flooring. The grain is usually interlocked for a unique look.

Patagonian Chestnut ▲

One of our most beautiful species imported from Paraguay. A very hard and dense wood with unique color and graining. Highly sought after and used for decades in Europe.

Wenge ▲

Exotic dark chocolate brown flooring from Central Africa. Creates a dramatic appearance in any setting. WFI offers both straight grain as well as mixed grain selections, as shown.
