WOOD FLOORING INTERNATIONAL		The Architectural Collection MultiPly Wood Flooring
3/8" x 3" or 5" MultiPly Architectural Collection		
Drawing: A - MultiPly	Date: February 1, 2005 (1) 856-764-2501 www.wflooding.com	

Milling:

Milled Tongue and Grooved all 4 edges. Milled with Ultra MicroEased edges and Square ends.

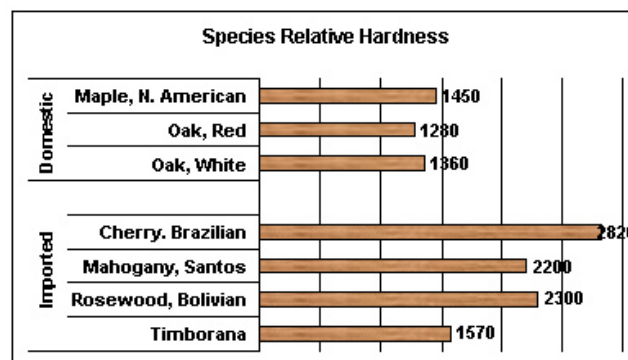

Construction:

Seven-ply, engineered construction composed of a sliced veneer, one piece, 1.2mm thick wear layer laminated to a 5 layer cross laminated core, backed by a like density balancing veneer backer.

Note: Bolivian Rosewood wear layer is only .6mm thick and is a doubled veneer to obtain a 1.2mm overall thickness.

Grades:

- Quartered** (all Straight Grain) **Clear Grade** - We call this our "Perfection" grade. It is highly selected for absolute straight graining and then is further selected for even, uniform color. This grade is without defect and must be seen to be fully appreciated as it is without equal on the marketplace. Available in Brazilian Cherry only.
- Rift & Quartered Select Grade** - which we also call our "Perfection" grade, is selected for straight graining and is without defect and contrasting sapwood/heartwood. It is the selected essence of the specie and ideal for formal, highly designed settings ! Available in North American Red and White Oak only.
- Select Grade** - This grade includes a mix of both flat sawn and straight grain and allows a wider range of color/graining than offered in our Quartered Clear/Select Grades. Available in Brazilian Cherry, Santos Mahogany, Bolivian Rosewood and North American Maple.
